I turn to the support service, conversion from bitcoins to rubles, can I not pay for it and get money? or can be debited from the transfer amount?

Olivia, according to the general legislation, all earnings on the Internet since 2018 are obliged to be registered under the IP address of the recipients. If the service pays for currency conversion from the funds received, then all operations related to cloud mining will be inhibited. This is the best solution for the service to bring more money to users. Currency conversion is done through Binance.

Wow! Ich habe ehrlich gesagt nicht sofort geglaubt, dass das möglich ist ... Immerhin habe ich die Bastarde so oft im Internet gefüttert! Und dann haben sie es einfach genommen und herausgebracht!

It is very convenient that you do not need to run through various services and change bitcoins for rubles with a huge commission.
